PROFESSIONAL SUMMARY

Full Stack and MERN Stack Developer with hands-on experience building scalable web applications, cross-platform mobile apps, and production-ready management systems. Proficient in React, Next.js, NestJS, FastAPI, Flutter, and PostgreSQL. Delivered complete end-to-end platforms from scratch across internships and freelance engagements. Strong in REST API design, full-stack architecture, database management, and cross-platform application development. Proven across 4 paid roles and 10+ shipped projects including international freelance clients.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Kotlin, Dart, SQL
Frontend: React.js, Next.js, Three.js, HTML5, CSS3, Tailwind CSS, Framer Motion, GSAP
Backend: FastAPI, NestJS, Node.js, Express.js, RESTful API Design, Server-Side Architecture
Mobile: Flutter, Dart, Android (Kotlin), Provider, GoRouter
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Supabase, Prisma ORM
Tools & DevOps: Git, GitHub, Deployment Pipelines, PyInstaller, Socket.IO, JWT

WORK EXPERIENCE

Full Stack Developer | Internship

Apr 2026 – May 2026

PetsGo and PetsDoor Pvt. Ltd.

Remote

- Developed the complete PRANAG AI web platform end-to-end — built responsive React frontend, designed scalable FastAPI backend with RESTful APIs, and structured PostgreSQL database architecture from scratch.
- Integrated Prompt Parser, PINN models, and prediction services; connected AI inference pipelines with frontend dashboards; built authentication system and deployment-ready scalable architecture.

Application Developer | Internship

Feb 2026 – Mar 2026

PetsGo and PetsDoor Pvt. Ltd.

On-site, Jaipur

- Built complete AI-powered cross-platform livestock diagnostic mobile application from scratch using Flutter, Dart, and Kotlin with biometric muzzle-print identification, CNN-based skin disease diagnosis, and MFCC acoustic health screening.
- Enabled real-time cattle scanning, automated diagnosis, health records management, report generation, and AI inference synchronization with FastAPI backend.

Lead Web Developer | Part-time

Mar 2025 – Dec 2025

Anukriti Prakashan

On-site, Jaipur

- Sole technical decision-maker — owned full lifecycle of company website including development, e-commerce functionality, deployment, and system architecture independently.
- Built Python-based finance management system tracking income, expenses, and multi-account transactions for business operations.

Backend Developer Intern

Feb 2025 – May 2025

Zenz Aawara

Remote, ACIC VGU Jaipur

- Designed and optimized RESTful APIs improving server-side logic, performance, and response efficiency; collaborated with frontend team and contributed to backend architecture decisions.

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – Present

Vivekananda Global University

Jaipur, India

WORK PROJECTS

PRANAG AI Web Platform | React.js, FastAPI, PostgreSQL, Python, TensorFlow, REST API

PetsGo

- End-to-end AI livestock management platform with Prompt Parser, PINN models, prediction services, and connected dashboards; includes auth, data management modules, and scalable deployment architecture.

AI Livestock Diagnostic Mobile App | Flutter, Dart, Kotlin, OpenCV, TensorFlow, MFCC, FastAPI

PetsGo

- Cross-platform cattle health monitoring app with biometric muzzle-print ID, CNN skin disease diagnosis, MFCC acoustic health screening, real-time health records, and backend API synchronization.

Company Website & Finance System | Web Development, Python, E-commerce, Deployment

Anukriti Prakashan

- Full-lifecycle publishing company website with e-commerce functionality and Python finance system for income, expense, and multi-account transaction tracking.

Backend API System | *REST APIs, Backend Architecture, Server-Side Optimization*

Zenz Aawara

- Optimized RESTful API layer for a product-based startup; improved server-side logic, response efficiency, and frontend-backend integration quality across the codebase.

PERSONAL PROJECTS

VCC ERP – Coaching Institute Management | *Flutter, Next.js, NestJS, PostgreSQL, Supabase, Prisma, JWT*

Personal

- Production-ready ERP with Flutter mobile app, Next.js admin dashboard, and NestJS REST backend; features role-based auth (Admin/Teacher/Student), student and batch management, attendance, fee tracking, quizzes, timetable, AI Tutor (NVIDIA NIM Llama 3.1), and performance analytics.

Rajasthali – Travel & Fleet Management System | *Flutter, Next.js, NestJS, PostgreSQL, Google Maps API*

Personal

- Full-stack travel management system with real-time GPS vehicle tracking, customer booking and reservations, live trip monitoring with route updates, driver/vehicle dashboard, and admin analytics panel.

CVCraft v2 – AI-Powered ATS Resume Builder | *FastAPI, React, MongoDB, NVIDIA AI, Tailwind CSS*

Personal

- Full-stack ATS resume builder with live editing, real-time ATS scoring with keyword optimization, NVIDIA AI content refinement, instant PDF export, and flexible multi-template MongoDB schema.

Aegis Care – Blockchain Healthcare System | *Algorand, Python, AlgoKit, Smart Contracts, IPFS*

Personal

- Decentralized healthcare platform on Algorand blockchain with role-based smart contracts (patients, doctors, admins) and IPFS-based tamper-proof medical record and prescription storage using content identifiers.

KidzGPT – AI 3D Learning Assistant | *React, Three.js, React Three Fiber, LLM APIs, Web Speech API*

Freelance

- Client-built AI learning assistant for children with interactive 3D animated characters, real-time voice and text AI conversations using LLM APIs, and gamified educational experience.

TodoUp – AI Productivity App | *Flutter, Dart, Supabase, Hive* | *Google Play Store*

Personal

- Published task management app on Google Play Store with AI-assisted task features, smart reminders, real-time Supabase sync, and offline Hive storage for seamless internet-free experience.

FREELANCE PROJECTS

Sploink.AI – VS Code Extension (\$5/hr) | *React, TypeScript, VS Code Extension API*

USA Client

- Frontend development for AI agent management VS Code extension for a US-based client; built responsive monitoring UI for agent workflow logs and real-time execution state visualization.

Client Portfolio & Business Websites | *React, Next.js, Three.js, GSAP, Tailwind CSS*

Multiple Clients

- Designed and delivered interactive portfolio and business websites for multiple clients with 3D visuals, GSAP animations, responsive layouts, and performance-optimized production deployment.

CERTIFICATIONS

Full Stack Developer Course – Simplilearn

Full Stack Development, Web Applications, MERN Stack

Introduction to MERN Stack – Simplilearn

MongoDB, Express.js, React.js, Node.js

Git Training – Simplilearn

Git, Version Control, GitHub Workflow

Google Play Store Listing Certificate – Google Play Academy

App Publishing, Store Optimization

Introduction to Generative AI – Google

Generative AI, LLMs, Prompt Engineering

Foundations: Data, Data, Everywhere – Google

Data Analysis, Data Literacy

Flutter Development – Cisco thingQbator, VIT

Flutter, Dart, Cross-Platform Development
