SUMMARY

Full Stack Developer focused on building scalable web applications and AI-driven systems. Experienced in FastAPI backend development, React frontend architecture, and integrating computer vision models into practical applications. Built multiple real-world projects including biometric cattle identification systems, full-stack SaaS tools, and dynamic CMS platforms. Strong focus on backend architecture, API design, and production-ready system structure.

EDUCATION

Bachelor of Computer Applications (BCA)

Sep 2025 – Dec 2025

Vivekananda Global University

SGPA: 8.13 /CGPA: 7.89

WORK EXPERIENCE

Full Stack Developer Intern -PetsGo (Paid)

Feb 2026 – Present

- Working on the Pranag AI project for livestock management solutions
- Contributing to frontend architecture and backend API planning
- Designing AI-ready system workflows for biometric integration
- Supporting scalable application structure and feature planning
- Building multi-modal AI features: biometric muzzle-print identification, cattle skin condition analysis (image-based), and acoustic health screening for early disease detection.

Technical Manager (Web & Digital Systems) -AnukritiPrakashan (Paid)

Mar 2025 – Dec 2025

- Managed website development and maintenance
- Handled e-commerce functionality and digital infrastructure
- Led technical decisions and deployment processes
- Improved system performance and online operations

Backend Developer Intern -ZenzAwwara Pvt. Ltd.

Feb 2025 - May 2025

- Designed and optimized RESTful APIs
- Improved server-side logic and performance
- Collaborated with frontend team for feature integration

Computer Teacher -InfoSphere (Paid)

Sep 2024 – Aug 2025

- Delivered RS-CIT training and computer fundamentals
 - Conducted hands-on practical sessions
 - Developed structured training materials
-

WORK PROJECT

Pranag AI – Livestock Management App - PetsGo

- Designed scalable App for AI-based cattle identification system
- Structured workflows for biometric and acoustic integration
- Focused on system-ready architecture for ML integr

Biometric Muzzle Identification System - PetsGo

- Built ML-based system for cattle identification using image processing
- Implemented preprocessing, feature extraction, and matching logic
- Used Python, OpenCV, and TensorFlow

Acoustic AI – Livestock Sound Analysis System -PetsGo

- Built AI system to analyze cattle sounds for health and behavior detection
- Implemented audio preprocessing, feature extraction (MFCC), and classification models
- Designed pipeline for real-time audio-based monitoring and alerts

Skin Disease Detection System -PetsGo

- Developed image-based ML model to detect common skin diseases
- Implemented preprocessing, augmentation, and CNN-based classification
- Achieved reliable prediction accuracy with optimized model training

DATA-Curator – Data Pipeline System -PetsGo

- Built pipeline for scientific data normalization
- Processed GenBank datasets into structured format
- Optimized for analytics and querying

E-Commerce Platform -AnukritiPrakashan

- Built a finance management system to track income, expenses, and account transactions.
- Designed structured transaction logic for monitoring household cash flow.
- Implemented backend-driven data handling using Python.

PERSONAL PROJECTS

CyrilxAI – Windows AI Automation Agent

Tech: Python, FastAPI, LangChain, Playwright

- Built desktop automation agent with voice commands + planning loop
- Integrated browser automation, OCR, and system controls
- Developed dashboard with live execution logs

Incognito Chat – Privacy Messaging App

Tech: Flutter, Supabase, SQLCipher

- Built secure chat app with hidden workspace system
- Implemented encryption, OTP auth, and privacy controls
- Developed real-time messaging system

Kartik-AI – Fitness AI App

Tech: Flutter, Dart

- Built AI-based fitness coach with Ai chat + tracking
- Implemented GPS tracking, Body Posture Tracker, Cal. & Drink Tracker and progress export
- Developed secure local storage system

CVCraft – Full Stack Resume Builder

Tech: FastAPI, React, MongoDB

- Built resume builder with real-time editing + PDF export
- Designed REST APIs and structured backend models
- Implemented flexible document storage

Stickman Arena Blitz – Multiplayer 3D Game

Tech: React, Three.js, Socket.IO, PostgreSQL

- Developed real-time multiplayer shooter with matchmaking
- Implemented rooms, leaderboard, and game modes
- Built full-stack real-time communication system

Family Finance Hub – Finance System

Tech: Python

- Built system to track income and expenses
- Designed multi-account transaction logic
- Focused on real-time cash flow tracking

Dynamic Portfolio Website – CMS

Tech: FastAPI, React, MongoDB

- Built fully dynamic portfolio platform
- Created admin panel for content control
- Enabled no-code updates

Dynamic Portfolio Website – CMS

Tech: FastAPI, React, MongoDB

- Built fully dynamic portfolio platform
- Created admin panel for content control
- Enabled no-code updates

Hope Paws 1 & 2 – Animal & Road Safety Platform

Tech: Web Stack

- Built community-based rescue reporting system
- Implemented geolocation-based services
- Designed user workflow for incident reporting

TodoUp – Productivity App (Play Store)

Tech: Flutter, Supabase, Hive

- Built and published task management app
- Implemented reminders, sync, and offline storage
- Added AI-assisted task features

MyAIOS – Android Architecture Project

Tech: Kotlin, Android

- Built modular Android system architecture
- Applied clean architecture principles
- Focused on system-level design

CodeUpPath – AI Developer Platform

Tech: React, Express, PostgreSQL

- Built platform for internships, blogs, and AI roadmaps
- Implemented authentication, admin CMS, and dashboards
- Designed scalable full-stack architecture

Aegis Care – Blockchain Healthcare Data Management System

Tech: Algorand, Python (Puya, AlgoKit), Smart Contracts, IPFS (CID)

- Built decentralized healthcare system for secure medical records and prescription management
- Implemented smart contracts for role-based access control (patients, doctors, admins)
- Integrated IPFS for privacy-preserving data storage using content identifiers (CID)
- Designed system for secure, transparent, and tamper-proof healthcare data handling

Aegis Care – Blockchain Healthcare Data Management System

Tech: Algorand, Python (Puya, AlgoKit), Smart Contracts, IPFS (CID)

- Built decentralized healthcare system for secure medical records and prescription management
- Implemented smart contracts for role-based access control (patients, doctors, admins)
- Integrated IPFS for privacy-preserving data storage using content identifiers (CID)
- Designed system for secure, transparent, and tamper-proof healthcare data handling

KidzGPT – AI-Powered Interactive 3D Learning Assistant

Tech: React, Three.js, React Three Fiber, AI APIs (LLM), Web Speech API

- Built AI-based assistant for kids with interactive 3D characters for engaging learning
- Implemented real-time AI conversations with voice/text interaction
- Designed animated 3D models controlled by AI responses to enhance user engagement
- Focused on gamified learning experience with visually interactive UI

FREELANCER PROJECTS

1. 3D Portfolio Websites (Paid Client Projects)

Role: Frontend Developer

Tech: React, Next.js, Three.js, React Three Fiber, GSAP, Tailwind CSS

- Built high-end portfolio websites with interactive 3D visuals and animations
- Developed responsive UI with smooth scrolling and modern design systems
- Delivered client-ready customizable UI with performance optimization

2. Sploink.AI – AI Management VS Code Extension (5\$/hr)

Role: Frontend Developer for USA Client

Tech: React, TypeScript, VS Code Extension API

- Contributed to frontend development of AI agent management extension
 - Built UI for monitoring agent workflows, logs, and execution states
 - Designed clean and responsive interface for developer productivity tools
-

TECH SKILLS

- **Technical Skills:**

1. Languages:- Python, JavaScript, TypeScript, Kotlin, Dart, SQL
2. Frontend Development:- React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion.
3. Backend Development:- FastAPI, Node.js, Express.js, RESTful API Design, API Development, Server-Side Architecture
4. Flutter, Dart, Android (Kotlin), Provider, GoRouter
5. Databases:- MongoDB, PostgreSQL, MySQL, SQLite
6. AI / Machine Learning:- TensorFlow, OpenCV, Computer Vision, Biometric Systems, Generative AI Integration, LangChain, LangGraph
7. Tools & DevOps:- Supabase, Git, GitHub, Deployment Pipelines, PyInstaller
8. Tech Stack:- FARM Stack (FastAPI + React + MongoDB), MERN Stack, Flutter + Supabase

- **Certifications:**

1. Introduction to Generative AI — Google | Aug 2025
 2. Foundations: Data, Data, Everywhere — Google | Apr 2025
 3. Google Play Academy – Store Listing Certificate — Google Play | Nov 2025
 4. Full Stack Development with MEAN — Cisco thingQbator | Nov 2025
 5. Flutter Development — Cisco thingQbator | Nov 2025
 6. CAD & 3D Printing — Cisco thingQbator | Nov 2025
 7. Cloud Systems Software — Georgia Institute of Technology | Sep 2025
 8. Network Function Virtualization — Georgia Institute of Technology | Sep 2025
 9. Innovating with the Business Model Canvas — University of Virginia | Feb 2025
 10. Boosting Time Management with AI Tools — LinkedIn | Nov 2025
 11. Quality Management Foundations — LinkedIn | Oct 2025
 12. Systems Thinking — LinkedIn | Oct 2025
