PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of hands-on experience building AI-driven systems, scalable web applications, and mobile apps. Currently developing multi-modal AI features at PetsGo including biometric muzzle-print identification (OpenCV + TensorFlow), CNN-based skin disease detection, and MFCC acoustic health screening for livestock management. Proven across 4 paid roles, 15+ shipped personal projects, and international freelance clients. Strong expertise in FastAPI backend architecture, React frontend, Flutter mobile, and production ML pipeline integration.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Kotlin, Dart, SQL
Frontend: React.js, Next.js, Three.js, HTML5, CSS3, Tailwind CSS, Framer Motion, GSAP
Backend: FastAPI, Node.js, Express.js, RESTful API Design, Server-Side Architecture
Mobile: Flutter, Dart, Android (Kotlin), Provider, GoRouter
Databases: MongoDB, PostgreSQL, MySQL, SQLite, Supabase
Tools & DevOps: Git, GitHub, Supabase, Deployment Pipelines, PyInstaller, Socket.IO

WORK EXPERIENCE

- Full Stack Developer Intern (Paid)** Feb 2026 – Present
PetsGo — Pranag AI – Livestock Management Platform Remote
 - Engineered multi-modal AI pipeline: biometric muzzle-print identification (OpenCV + TensorFlow), CNN-based cattle skin disease classifier, and MFCC acoustic health screening system for early disease detection.
 - Designed scalable FastAPI backend architecture and RESTful API structure for AI-ready livestock management application supporting biometric and acoustic data integration.
 - Built and maintained React frontend components; contributed to system architecture planning for multi-modal biometric feature rollout.
 - Structured end-to-end ML workflows: data preprocessing, feature extraction, model training, classification, and real-time monitoring alerts.
- Technical Manager – Web & Digital Systems (Paid)** Mar 2025 – Dec 2025
Anukriti Prakashan Jaipur, India
 - Owned full lifecycle of company website: development, maintenance, e-commerce functionality, and digital infrastructure management.
 - Led all technical decisions and deployment processes; improved system performance and online operational stability.
 - Built Python-based finance management system tracking income, expenses, and multi-account transactions for business operations.
- Backend Developer Intern (Paid)** Feb 2025 – May 2025
ZenzAwwara Pvt. Ltd. Remote
 - Designed and optimized RESTful APIs; improved server-side logic, performance, and response efficiency.
 - Collaborated with frontend team to integrate APIs and deliver new product features on schedule.
- Computer Teacher (Paid)** Sep 2024 – Aug 2025
InfoSphere Jaipur, India
 - Delivered RS-CIT certification training and computer fundamentals to students; conducted structured practical sessions and developed curriculum materials.

EDUCATION

- Bachelor of Computer Applications (BCA)** 2024 – Present
Vivekananda Global University Jaipur, India
 - SGPA: 8.13 | CGPA: 7.89

WORK PROJECTS – PETSGo (AI LIVESTOCK PLATFORM)

- Pranag AI – Livestock Management App** | *FastAPI, React, Python, TensorFlow* Feb 2026 – Present
 - Designed scalable application architecture for AI-based cattle identification platform; structured workflows for biometric, acoustic, and image-based ML integration.
- Biometric Muzzle Identification System** | *Python, OpenCV, TensorFlow* PetsGo
 - Built ML-based cattle biometric identification system using image preprocessing, feature extraction pipeline, and similarity matching logic for unique animal identification.
- Acoustic AI – Livestock Sound Analysis System** | *Python, MFCC, Classification Models* PetsGo

- Developed AI system to analyze cattle vocalizations for health and behavior detection; implemented audio preprocessing, MFCC feature extraction, classification models, and real-time alert pipeline.

Skin Disease Detection System | *Python, TensorFlow, CNN, OpenCV* PetsGo

- Built CNN-based image classifier to detect common cattle skin diseases; implemented data augmentation and optimized training pipeline for reliable prediction accuracy.

DATA-Curator – Scientific Data Pipeline | *Python, PostgreSQL* PetsGo

- Built data normalization pipeline processing GenBank genomic datasets into structured format; optimized for analytics and high-performance querying.

PERSONAL PROJECTS

CyrixAI – Windows AI Automation Agent | *Python, FastAPI, LangChain, Playwright* Personal

- Built desktop AI agent with voice command input, planning loop, browser automation, OCR, system controls, and live execution dashboard.

Aegis Care – Blockchain Healthcare Data Management | *Algorand, Python, AlgoKit, Smart Contracts, IPFS* Personal

- Built decentralized healthcare platform for tamper-proof medical records and prescription management; implemented role-based smart contracts (patients, doctors, admins) and IPFS privacy-preserving storage using content identifiers.

CVCCraft – Full Stack Resume Builder | *FastAPI, React, MongoDB* Personal

- Built full-stack resume builder with real-time editing, PDF export, REST API backend, and flexible MongoDB document storage.

Stickman Arena Blitz – Real-Time Multiplayer 3D Game | *React, Three.js, Socket.IO, PostgreSQL* Personal

- Developed real-time multiplayer 3D shooter with matchmaking system, game rooms, leaderboard, and full-stack WebSocket communication.

Incognito Chat – Privacy Messaging App | *Flutter, Supabase, SQLCipher* Personal

- Built end-to-end encrypted chat application with hidden workspace system, OTP authentication, SQLCipher encryption, and real-time messaging.

TodoUp – Productivity App | *Flutter, Supabase, Hive* | *Published on Google Play Store* Personal

- Built and published task management app with AI-assisted task features, reminders, real-time sync, and offline Hive storage.

Kartik-AI – Fitness AI App | *Flutter, Dart* Personal

- Built AI fitness coach app with AI chat, GPS tracking, body posture analysis, calorie and hydration tracker, progress export, and secure local storage.

CodeUpPath – AI Developer Platform | *React, Express.js, PostgreSQL* Personal

- Built full-stack platform for developer internships, AI learning roadmaps, and blogs; implemented JWT authentication, admin CMS, and analytics dashboards.

Dynamic Portfolio Website – CMS | *FastAPI, React, MongoDB* Personal

- Built fully dynamic portfolio platform with admin panel for no-code content management; designed REST APIs and flexible MongoDB document storage for real-time updates.

Hope Paws 1 & 2 – Animal & Road Safety Platform | *React, Node.js, Geolocation API* Personal

- Built community-based animal rescue reporting platform with geolocation services, incident reporting workflow, and real-time status tracking.

MyAIOS – Android Architecture Project | *Kotlin, Android* Personal

- Built modular Android system applying clean architecture principles; focused on system-level design, separation of concerns, and scalable module structure.

Family Finance Hub | *Python* Personal

- Built multi-account finance tracking system with real-time cash flow monitoring and structured transaction logic for household income and expense management.

FREELANCE PROJECTS

KidzGPT – AI 3D Learning Assistant | *React, Three.js, React Three Fiber, LLM APIs, Web Speech API* Freelance

- Built AI learning assistant for children with interactive 3D animated characters, real-time voice/text AI conversations, and gamified engagement experience.

3D Portfolio Websites (Paid Client Projects) | *React, Next.js, Three.js, GSAP, Tailwind CSS* Freelance

- Delivered high-end interactive 3D portfolio websites for clients with smooth scroll animations, responsive design, and performance-optimized UI using Three.js and GSAP.

Sploink.AI – VS Code Extension (\$5/hr, USA Client) | *React, TypeScript, VS Code Extension API* Freelance

- Contributed frontend development for AI agent management VS Code extension; built monitoring UI for workflow logs and execution state visualization for developer productivity.
